

Dawit Hagos, Web Developer

I am a highly motivated, team player eager to develop my professional skills. Skills in front-end and back-end development, responsive programming for both static and dynamically loaded content. Fundamental understanding of API development.

Technical Skills

Front End: JavaScript, HTML5, CSS, SASS, React, Redux, Material UI

Back End: Node.js, Express, RESTful API Development, MySQL, MongoDB

Tools: Git, Docker, Postman, Visual Studio Code, npm, regex, Firebase

Projects

HR System | *React, Node, Express, MySQL, Axios* (<https://github.com/dawhagos/hr-system>)

- Created an HR Management System that utilizes the CRUD operations to persist storage.
- Used Express framework to create backend and MySQL Database created and connected to the HR System
- Used React state hooks to allow user inserted data to be collected, stored and sent to the MySQL database.

Countries by Continent | *Javascript, GraphQL* (<https://github.com/dawhagos/countries-graphql>)

- Utilized a Countries GraphQL API to access every country and languages organized by continent
- Used Fetch API to handle querying the GraphQL API, and posting the responses to the web page.

Hotel Website | *HTML, CSS, Javascript* (<https://github.com/dawhagos/responsive-hotel>)

- A realistic example of a Hotel website with responsive styling.
- Intended to have a fully functioning online booking including a Rooms page, Testimonials page and more.

Chat App | *React, Firebase* (<https://github.com/dawhagos/chat-app>)

- Built an instant chat application including online statuses, image support, and more
- Used Firebase Google authenticator to allow Google login for all users.
- Used React hooks to serve loading page and all of the user data

Education

University of California Riverside, Riverside CA
